Third-year Biotechnology Engineering student (4 Semesters left)

"Passionate about leveraging scientific expertise and innovative techniques to advance biotechnological research and development. With extensive experience in molecular laboratories and genetic engineering, I am proficient in organic chemistry, analytical chemistry, biochemistry, and microbiology. Dedicated to enhancing research outcomes through precise and efficient experimental design, I am seeking opportunities to contribute to impactful projects in biotechnology that address real-world challenges and push the boundaries of scientific discovery."

Education:

2021-2026- ORT BRAUDE | B.Sc. Biotechnology Engineering

Relevant Coursework:

Biochemistry, Microbiology, Organic Chemistry, Analytical Chemistry, Molecular Biology, Genetic Engineering, Immunology, Fluid Mechanics, Quality Assurance, Water Chemistry , Heat transfer and mass transfer .

Previous employment:

Therapeutic Counselor at a Shelter for At-Risk Girls, Nazareth,
2019-2022- Senior Role in Customer Service, HOT company

*** Although I lack direct industry experience, I bring a solid academic foundation, extensive hands-on laboratory skills, and a proven ability to learn quickly and adapt to new challenges. My dedication to precision, organization, and continuous improvement ensures I can make a meaningful contribution from day one**

Technological Skills:

- Proficient in operating laboratory equipment and conducting laboratory tests.
- Skilled in molecular techniques, data analysis, and experimental planning
- Quick learner with a proactive approach to problem-solving

Languages :

Hebrew: Full Working Proficiency Arabic: Mother tongue Excellent English proficiency
